### Mechanical dimensions and Pin configuration

All dimensions in mm

Connector type: cable

Case: FMC 90x90x26

**This DC/DC converter may only be operated for short periods at minimum input voltages and maximum loads, as the cable cross-sections are not suitable for this. The cable cross-section of 1.5 mm<sup>2</sup> has a maximum current carrying capacity of 18 amperes. This means that the conductor with this cross-section can carry a maximum current of 18 amperes under certain conditions. When operated at full load continuously, the input voltage must not drop below 20VDC! Otherwise the specifications of the input wires are exceeded.**
